Himachal Pradesh. Fruit processing capacity in Himachal Pradesh is estimated at 80,500 MT per annum.

Recognizing the potential of horticulture for socio economic development of the hilly states including Himachal Pradesh, the Govt, of India has extended the Technology Mission for Integrated Development of Horticulture in North Eastern States (including Sikkim) to Himachal Pradesh along with Jammu & Kashmir and Uttaranchal. The goals of the Mission are to establish convergence and synergy among various on-going Governmental Programmes in the field of horticulture development to achieve horizontal and vertical integration of these Programmes. Technology Mission consists of four Mini Missions to address various aspects of horticulture development including research, production, post harvest management, marketing and processing. Mini Mission-IV is concerned with processing which is implemented through Ministry of Food Processing Industries.

The Fruit & vegetable processing units are already exempted from payment of excise duty. In the year 2004-05 the Government has allowed under Income Tax Act, a deduction of 100% of profit for five years and 25% of profits for the next five years in case of new agro processing industries set up to process, preserve and package fruits and vegetables. In the Union Budget of 2006-07, Government has announced exemption of excise duty on condensed milk, icecream, preparation of meat, fish and poultry, pectins, pasta and yeast. Custom duty on packaging machines has been reduced from 15 percent to 5 percent. NABARD has created a separate window with a corpus of 1,000 crore for refinancing loans to the sector, especially for agro-processing infrastructure and market development. The incentives available for the food processing sector and special measures taken under the Horticulture Technology Mission are likely to create a conducive environment in Himachal Pradesh for attracting more investment in Food Processing Industry.

**Juvenile homes**
